Dancing SOQI 2008

The holiday season is upon us and this is the time of year we like to remind ourselves to reach out and help our distributors in need, around the states and around the world.

Our Growth Speaks for Itself

Because of HTE's dedication to its members' personal and professional growth, we are an increasingly successful company. We believe SOQI is an incredible option for HTE Distributors. Our SOQI growth speaks for itself; this past year we have seen a 50% increase in domestic gross sales. This growth is a direct result of successful partnerships with successful business owners. We provide the system so the distributors can focus on what is most important: developing a strong business founda-

tion and building on it to reach ever-higher levels of success.

What's Next?

We believe that the healthcare business is an incredibly fulfilling career option, personally and professionally, and we offer you the opportunity to run such a business profitably and that will enable you to continuously contribute to

the betterment of society. Other companies focus on building their network, but we focus on building systems and territories that, with appropriate investments of time and money, are guaranteed to succeed. Studies have projected that the demand for our services will increase over the next two decades.

Support and Ongoing Training for our Distributors

From the moment you begin your HTE business, we walk with you through the process including the initial and ongoing training. Then we provide

continued support as your business grows. We conduct regional meetings and two semi-annual conferences where you can learn from other successful distributors. In addition, we offer conference calls, special events, and our unique Home Party model. We provide all the tools you need to be a successful business owner.

HTE History in the Making - Again!

We believe that HTE not only offers significant advantages over other similar healthcare companies, but also supplies excellent products that exceed its customers' expectations. In addition to the Chi Machine, Hot-House, and ERE that HTE proudly distributes, we are now introducing an amazing breakthrough product: E-Power. We invite you to join the amazing E-Power launch seminar.

Thank you for joining with us and we wish you a Merry Christmas and Happy New Year!

Eric Pan, CEO
HTE Americas

HTE Introduces the New Product -

E-power

New Negative Potential Body Energizer

A Technological Breakthrough in Electronic Health Care Products

E-Power was designed to provide Negative Potential Energy with High Frequency Energy. Using your body as a capacitor, E-Power generates 70KHz of high frequency electrical waves, creating an internal energy that will balance and revitalize you.

As *E-Power* increases the temperature of your subcutaneous skin, Negative Potential spreads throughout the entire body, relaxing you and creating a balanced electrical field as well as balances the functions of cations (positively charged ions) and anions (negatively charged ions) on both sides of the cell membrane. This promotes a faster metabolism and helps to build up immunity. It is an energy source that your body needs not only to survive, but to thrive! *E-Power is the energy you need to bring it to you!*

The Principle of Design

The technology developed for Negative Potential Energy and High Frequency Energy combines theories of modern medical science, electronics, Traditional Chinese Medicine, and the biology of micro-molecules. Using your body as a capacitor, *E-Power* creates an internal energy that will balance and refresh you.

Since there are 30-40 millivoltages in a cell membrane in your body, and approximately six trillion (6,000,000,000) cells in the whole body, the total electric potential is a very considerable number.

In addition, the electric potential in the human body decreases with age, and the reduction of electric potential can cause illnesses. For this reason, it is necessary to increase the electrical potential to increase health. HTE developed *E-Power*, so that you can easily increase your electric potential.

1 or 2 daily sessions for 30-60 minutes each session is all you need to experience balanced energy in your life.

Main Benefits Derived From E-Power:

- 1.Activates Cells
- 2.Increases Blood Circulation
- 3.Adjusts Nervous System
- 4.Normalizes Metabolism
- 5.Detoxifies Your Body
- 6.Improves Physique
- 7.Boosts Immune System
- 8.Enhances Beauty
- 9.Improves Skin
- 10.Weight Loss
- 11.Increases ATP energy

Product Advantages:

- 1.Easy to Handle & Use
- 2.Portable & Convenient
- 3.No Known Negative Side Effects
- 4.Internationally Patented Design
- 5.Noticeable Results
- 6.Two Ports for 2 People

Suitable For:

Healthy Physiques: Balance your organ functions and enhance muscle strength.

Weak Physiques: Adjusts different physiological functions.

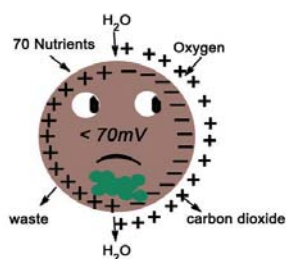

Unhealthy Physiques: May take some time, but it can help you get healthier.

No.:HBM-618
AC Voltage: 110V, 220V
Input Power: 18W+20%
Power Supply Frequency: 50-60Hz
High Frequency: 70KHz±10%
High: 2500 ± 100 V
Middle: 2300 ± 100 V
Low: 1900 ± 100 V
Negative Potential:
High: -1000 ± 100 V
Middle: -800 ± 100 V
Low: -600 ± 100 V
Time: 0, 30, 60, 90 min
Weight:(approx.) 7.6 Pound
Size(waist belt):
(approx.) 57.2 x 6.8 inch
Size(Test Pen):
(approx.) 7.1x1.4x0.9 inch
Dimension:
(approx.) 12.7x12.5x6.5 inch

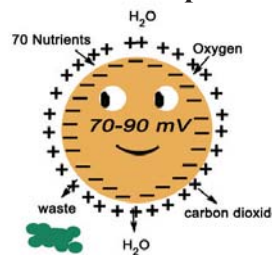

E- POWER activates cells and breaks through traditional medicine to improve functions of the main 8 body systems - Circulatory System, Nervous System, Digestive System, Bowel Movements, Immune System, Skeletal System, Weight Loss and Improve Skin. It is suitable for everyone in the family.

Why Positive Potential can be harmful?

- Nutrients, Oxygen and H₂O can not get in.
- Waste, Carbon Dioxide can not get out.
- Inside cell gets too much sodium+ / hydrogen+

Why Negative Potential is Important?

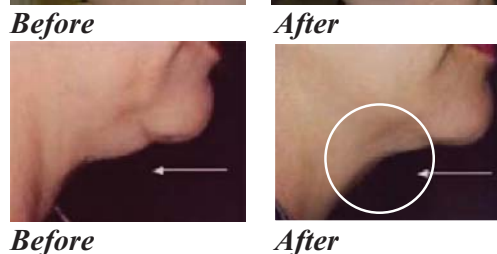

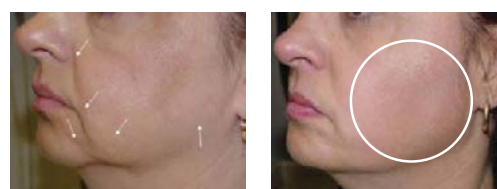

The Comparisons between Positive and Negative Ion Field:

Body Systems	Negative Field Action	Positive Field Action
Autonomic Nervous System	Stimulates Parasympathetic Nervous System (may cause relaxation)	Stimulates Sympathetic NS (may cause stress)
Whole Body	Calms, Relaxes, Deep sleep	Stress, Insomnia, Depression
Nutrient Absorbing	Increases Utilization	Dampens Utilization
Oxygen Intake	Improves by study 30%	Decreases, dampens Bronchioles.
Blood Pressure	Tends to Normalize	Tends to go up
Blood sugar	Lowers, reduce risk of diabetes	Increases
Metabolism	Can Increase	Can Decrease
PH	Alkalizes, above 70 millivolts Cell membrane – 8 pH Electrons spins clockwise Spinning off acid water-wastes	below 70 millivolts Cell Membrane – 2 pH Electrons Spin Counter Clockwise, Attracting Acids & wastes
Immune function	Increases Macrophages, B Cells, T Cells, Helper Cells	Can Dampen Immune Function

The benefits from Negative Ion Field

1. Increased Cell Membrane Voltage activates the sodium/potassium pump
2. Improvement of Blood Circulation due to Vasodilation
3. Release of Calcium
4. Triggers the Spleen and Bone Marrow to Increase Calcium
5. Shortens recovery & repair time for Athletes, & Disability
6. Pain Relief
7. Improves the Function of the Stomach and Intestines
8. Increases Collagen

Warning! Do Not Use:

- o If you have a pacemaker
- o If you have a high fever
- o If you have implants of gel or silicon
- o If you're menstruating
- o If you're pregnant
- o With metallic items such as badges or jewelry
- o Drink alcohol within one hour.

You must remove all electronic items from yourself including cellular phones, handheld computers, games, calculators, etc. You must remove all metallic items such as badges, jewelry or watches.

Secret of BetaLoe™

MRSA, short for methicillin-resistant *Staphylococcus aureus*, has been ravaging schools across the US this year. The drug resistant infection has been reported in schools in at least a half dozen states, and recently killed one student in Virginia and another in New York. According to the Centers for Disease Control (CDC), MRSA, characterized as a “Superbug” by some, is responsible for more deaths each year in the United States than the AIDS virus.

The Centers for Disease Control and Prevention (CDC) just reported in the *Journal of the American Medical Association* that in 2005, 94,000 people contracted serious, or invasive, staph infections and 19,000 of them died; rates three times the previous estimates. Both staph and MRSA can cause more-serious skin infections or they can lead to pneumonia, or infections of the bloodstream, ear, urinary tract, or the lining of the brain.

Today, the fear of germs is rampant. Besides the threat of biological attack, we’ve been programmed to fear germs coming at us from all sides. Although some bacteria are potentially more damaging to the body, living in fear of them and trying to eradicate them totally is not the solution.

These days it’s virtually impossible to buy any soap or cleaning product which does not have “antibacterial” plastered all over its label. There’s now even a product which you can just squirt on your hands to kill the nasty little bugs. Is this an advance for hygiene? Or, is it a dangerous manifestation of the misunderstanding we have about how our bodies work?

Bacteria help form the fabric of our bodies. Our bodies are composed of more bacteria than cells. Bacteria on our skin munch on the dead skin cells. Without them, we’d be peeling and flaking all over the place. Bacteria in our intestines help us break down and digest our food. We have a symbiotic relationship with many different types of bacteria. This means that both benefit from the relationship.

Yet, Madison Avenue would have us believe that it is necessary to stamp out every little bug that ever crawled on the planet. In the immortal words of Dr. Palmer, “You never know how far reaching something you might think, say or do today can affect the lives of millions tomorrow.” In our zeal to eradicate bacteria, are we planting the seeds for larger problems? Research has shown that early exposure to certain bacteria strengthens the immune system. By over sanitizing the environment, we may be weakening ourselves and our children. Exposing children to normal household and environmental dirt may decrease their chances of developing allergies when they’re older.

A.J. Lanigan

With improvements in hygiene, sanitation and living conditions, infections by parasites have been virtually eradicated in the developed nations. About the time that parasitic infections disappeared, the incidence of autoimmune diseases (e.g. multiple sclerosis, lupus, rheumatoid arthritis) increased dramatically. Coincidence? Maybe not. Researchers, noticing this coincidence introduced parasite eggs into a number of people with autoimmune disorders. Their conditions improved dramatically. When the researchers then treated the subjects to get rid of the parasites, the original conditions returned.

Does this mean that we should go back to unsanitary conditions or re-introduce parasitic infections into the population? No. It does caution us that we really don’t know what we’re doing when we mess around with Mother Nature. The tremendous overuse, abuse and misuse of antibiotics in the human and animal population, combined with the widespread use of antibacterial agents have created strains of “super bugs” to which our bodies have not had time to adapt. We’ve speeded the evolution of these organisms by perhaps millions of years, while slowing our ability to adapt by sending the antibiotics in to do the job our own immune system is supposed to do, thus weakening the system’s ability to respond and adapt to invasion by outside organisms.

The approach that makes the most sense is to do all we can to insure the normal functioning of our body. When our body is working at its best, it is less likely to be susceptible to invading bacteria and is more capable of fighting off any infections that occur on its own. Rather than fighting an enemy, which is not the real problem, in the first place, let’s do all we can to enhance the natural well-being of our bodies.

With BetaLoe, you can do no harm and help the body in a very large way by helping your immune system to be all that it can be. Learn more about aloe and beta glucan which go to make up this fine product. I helped to write some of the monograph along with Drs. Don Cox and Vaclav Vetvicka. I suggest that you go to this site for reliable, well-referenced scientific data on the primary ingredient. http://en.wikipedia.org/wiki/Beta_glucan

Have a happy day,

A.J. Lanigan

Come and Join us!!

HTE 2008 Spring

Outstanding Distributor Seminar

in Los Angeles

Big Offer: (Buy in)

“4-Day, 3-Night Trip with One day Training Seminar “

March 8 - March 11, 2008

Seminar Features:

March 9, 2008 Sunday 9:00 A.M. - 4:00 P.M.

- *New Product Lunch: New ERE, New Total Enzyme*
- *Power of Training & Testimonials.*
- *Complimentary Lunch*
- *Interaction Between Distributors:*
Provides knowledge, support, and valuable contacts, creating excitement and motivation!
- *Grand Recognition*
- *Special Offer Announcement*
- *Lucky Draw*
- *A 4-Night Cruise to Baja, Mexico for Top 10 winners and distributors who accumulate over 160 trip points.*
- *One-Day City Tour (March 10, 2008 Monday 9:00 A.M. - 4:00 P.M.)*

This 4-day, 3-night trip, including accommodations, seminar admission, lunch, and much, much more is only **\$200!**

Your 6-hour spectacular **Los Angeles City Tour** is only \$25 after HTE pays half of the expense for each attendee (retail value \$50 per person).

It's our great pleasure to host this event and to accommodate you as best we can. We truly hope you enjoy your stay at the Los Angeles Marriott Downtown hotel located in the heart of the financial district of downtown Los Angeles. With 400 guest rooms and 69 suites, this is one the most comfortable and spacious hotels in the downtown area. Los Angeles Marriott Downtown offers a beautiful outdoor heated pool, three restaurants and a lounge. Its close proximity to

many attractions including Staples Center, Los Angeles Convention Center, Music Center, Cathedral, Dodger Stadium, Beverly Hills, Hollywood, Universal Studios, and Disneyland, make it a popular vacation destination.

Remember, 2007 is coming to an end! It's time to sprint to the finish line and work harder than ever before, and be rewarded by HTE with a trip to **Los Angeles!**

“HTE reserves the right to amend, change or alter rules and guidelines at any time at the company's discretion and without prior notice.”

Highlight Of Month

Our health is our most precious possession. When our health fails, it affects everything in our world. I knew this only too well as I was overweight and came down with one sickness after another. My body ached and I was exhausted and depressed. Before I knew about the Chi Machine, I was always ill.

Then Kim introduced me to the Chi Machine. I saw immediate improvements in my body and health. My spirit returned and I decided that I wanted to introduce this miraculous machine to my family and friends. Like me, they were recovering from their illnesses and living happier and healthier lives. Seeing them become younger and stronger gave me the energy to strive for my goals and it was just a short time later that I became an HTE member.

My friends and family have been so satisfied with the results they have experienced using the

Chi Machine, HotHouse, and ERE that they have introduced these machines to their families and friends and my business is growing itself! I would like to share these main points that have helped me in my business:

1. Health is more important than money and true success comes from helping our clients discover the keys to health.

2. Your customers are the most important element of your business. I support my customers at anytime and in any way I can. If they have a question I do not know the answer to, I do my best to find the answer.

3. My customers are my top priority, but my team members are also very important. I stay in contact with them. We use each other's experiences as learning tools. I believe that my team members are very happy because I strongly support them and, in turn, the positive feedback I hear from them helps keep me motivated.

4. I explain concepts clearly and in detail so my team members will fully understand them. If the team members understand, the customers stand a much better chance of understanding also.

Whenever I purchase a new device, I want to clearly understand its uses and benefits, and I apply this same principle to my customers. Our customers are investing in important tools for health and well-being and I am happy to explain as much to them as I can. My father once told me, **"If you satisfy**

the customers, they will walk away satisfied." I kept this in mind when I received a call at three o'clock in the morning from an elderly woman in France who wanted to buy a Chi Machine. I received another call from Europe from a lady who wanted to order the 3 Musketeers. Even though these calls came in the middle of the night, I was happy to receive them and gave the customers my full attention.

My goal is to introduce these healthful machines to as many people as possible so they, too, can enjoy full and happy lives. I wish you all good luck and success for the future.

I would like to thank God who blessed me in my business. Thank you, Mr. Be, Mrs. Kim, HTE Company, the staff members of HTE, especially Mr. Kenny Lai, the members on my team, and all of my clients.
